WORKPLACE HEALTH & SAFETY POLICY STATEMENT

Lowcock Builders' Workplace Health & Safety Policy is dedicated to developing and maintaining a Workplace Health & Safety Management System that demonstrates our commitment to providing a safe work environment for all employees, contractors and general public.

We believe having a thorough management system is key to identifying and managing risk and hazards to ensure the overall success and safety of our projects.

Lowcock Builders have in place fully documented Safety Management Systems, externally certified to ISO 45001:2018. Continual auditing and reviews are undertaken to ensure constant improvement and compliance.

Obligations

Lowcock Builders Workplace Health & Safety Policy obligations are to continue our commitments to developing our safety knowledge, company safety systems and procedures. Constant growth and improvement of safety systems, training and delivery will create a safer work environment for all employees, contractors, the general public and stakeholders alike.

The future of safety compliance for Lowcock Builders is in having the best safety systems. Our company uses an efficient safety management system to monitor, record, store and complete all safety related information (in Dropbox/Site Books project files).

Objectives:

- Create and maintain a safe work environment for employees, contractors and visitors
- To comply with the requirements of ISO 45001:2018
- Provide adequate training
- Provide PPE & first aid equipment
- To undertake safety inspections and monitoring
- To assess project related risk and identify and manage hazards
- To induct all workers, contractors & visitors on site
- To gather and store all safety documentation
- To investigate incidents and take corrective action to prevent reoccurrence
- To comply with legislative requirements
- Use technology to gain a higher level of compliance, document control and retention

To implement this policy, we shall focus on the Workplace Health & Safety requirements of our business with reference to consistently meeting legislation and project requirements. Our Workplace Health & Safety management system will provide a way to monitor system issues and promote company improvements and growth.
